Making the most of Oxford Journals Online Collection.

Part 4 Content Alerting

OXFORD JOURNALS ONLINE COLLECTION

Our collection includes over 212 titles online

We have a wide subject coverage including:

- Life Sciences
- Mathematics and Physical Sciences
- Medicine
- Social Sciences
- Humanities
- Law

Receive tables of contents alerts by email for this journal

If you don't want to check your mailbox for new content alerts, then you can receive details direct to your screen using RSS feed.

What are RSS Feeds?

- RSS (“Really Simple Syndication”) is an established technology for providing up-to-date newsfeeds from web sites to end users.
- To receive RSS feeds you will need a web or desktop based ‘feed reader’ to regularly check for and download new content. A variety of these can be downloaded from the Internet.
- Each journal offers an RSS feed of the latest Table of Contents, providing RSS users with a convenient alternative to e-mail alerts.

Two feeds are available:

- RSS feed of current issue
- RSS feed of recent issues (covers the latest 3 issues, including the current issue).

RSS FEEDS

Alerts will appear on-screen allowing you to link through to selected content immediately.

PDA DOWNLOADS

What are PDA downloads?

- This service allows you to download Tables of Contents and abstracts for reading on your PDA.

Why?

- If you are often away from your desk and find it difficult to keep up-to-date with the latest research then this service could be for you.

Which Titles?

- This service is available on selected titles only. Please check the individual journal homepages for a 'PDA Access' link.

Vasopressin antagonism: a future treatment option in heart failure

Pramod Sanghi, Barry F. Uretsky and Ernest R. Schwarz*

Division of Cardiology, Department of Internal Medicine, The University of Texas Medical Branch, School of Medicine, 5106 John Sealy Avenue, 301 University Blvd, Galveston, TX 77555-0553, USA

Received 11 June 2004, revised 23 November 2004, accepted 16 December 2004, online publish-ahead-of-print 4 February 2005

*Corresponding author. Tel: +1 409 772 9131, fax: +1 409 772 4862. E-mail address: rzschwarz@utmb.edu

Arginine vasopressin plays an important role in volume homeostasis. Patients with heart failure have chronically elevated plasma vasopressin concentrations which may contribute to their clinical syndrome of fluid retention. Recently, a number of agents have been developed to antagonize the effects of vasopressin by targeting its V_{1a} and V₂ receptors, which are involved in vascular tone and free water regulation, respectively. Two vasopressin antagonists, in particular, tolvaptan and conivaptan, have shown promise in animal studies and small-scale human trials. The following is a review of current experimental and clinical studies using vasopressin antagonists and their potential role in the treatment of heart failure.

Key Words: Vasopressin • Antidiuretic hormone • Heart failure
