

Instructions for Accepted Manuscripts

Submission of the final version of accepted papers should follow standard *AJAE* submission guidelines (http://www.oxfordjournals.org/our_journals/ajae/for_authors/general.html) except that in addition to uploading a PDF file, authors should also upload the native file in any popular word processing software (Word is preferred). The journal's editorial software provides an opportunity to upload the native file as a supplemental document. The final manuscript file should include a title page with the title, authors' names, abstract, keywords, JEL codes, running head, and a leading un-numbered footnote. More information on formatting the title page is available on the submission guidelines page.

Authors must also complete and sign the Author's Final Checklist (available online), which can be completed with an electronic signature and uploaded with the native manuscript files.

Special Formatting

Do use character formatting—i.e., formatting you can do on single characters or words (bold for vectors and matrices, italic for variables, superscript, subscript)—but do *not* use your processor's other special features (auto footnote placement, table editors, etc.). Put footnotes and tables at the end of the file. More formatting information is available on the *AJAE* submissions guidelines page (http://www.oxfordjournals.org/our_journals/ajae/for_authors/general.html).

Page Charges

Major support for this journal comes from page charges of \$95 per printed page or a fraction thereof, payable by the supporting institution or granting agency. Payment does not affect acceptance, scheduling, or form of publication. Instructions for payment are sent with the galley proofs.
