The Journal of World Energy Law & Business

General Editor: Peter Roberts

GENERAL COUNSEL, CENTRICA ENERGY, WINDSOR, ENGLAND

Journal of World Energy Law & Business is the official journal of the Association of International Petroleum Negotiators and provides objective high-quality articles combining academic excellence with professional relevance. It benefits from the expertise of a Board of internationally respected academic, lawyers and other energy professionals, and is peer-reviewed.

By publishing articles on legal, business and policy issues in the international energy industry, the journal addresses upstream oil and gas transactions, finance, taxation, regulation, dispute management, alternative energy resources, energy policy and security and international energy organizations.

JWELB is your first point of contact for all legal, regulatory and commercial commentary within the international energy sector

Journal of World Energy Law & Business provides:

High-quality articles, comments and briefings on the international energy industry

A multi-disciplinary approach to analyzing important energy issues from the perspectives of commercial, financial, legal, economic, political, environmental and policy experts

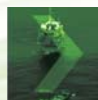

Practical, insightful and relevant information on emerging issues that will assist energy sector negotiators and lawyers in their transactional work

Latest thinking on best practices and tools in the industry

Print and online content, including advance access online ahead of print

Broad distribution of the AIPN's annual research papers and student competition papers

High-quality articles, comments and briefings on the international energy industry

Journal of World Energy Law & Business addresses topics of important relevance to legal practitioners, business and finance people, policy makers, and academics in the energy world. Topics include electricity and renewables, resource nationalism, expropriation, contract stabilization and renegotiation, investment treaties and disputes, ownership unbundling, reciprocity, the evolution of environmental standards, public-private partnerships, mineral development regimes, maritime regulation, the competition for resources, valuation, compensation standards, policy trends and much more. Combining a strong legal, policy and business approach, the *Journal of World Energy Law & Business* has every energy base covered.

A multi-disciplinary approach to analyzing important energy issues from the perspectives of commercial, financial, legal, economic, political, environmental and policy experts

Journal of World Energy Law & Business strikes the perfect balance between a practical energy law and business companion, enhancing and supplementing professional energy skills, and providing a rigorous and vibrant vehicle of current energy debate and thinking. By combining these approaches the *Journal of World Energy Law & Business* cross-fertilizes disciplines and helps you understand the current and future state of play in the energy sector

“Useful, informative and up-to-date; JWELB is a welcome resource for practitioners in the field of international energy law and dispute resolution. JWELB’s online format is easy to navigate. OUP’s many additional online services allow readers to manage, receive, or reproduce JWELB content according to their professional needs and particular interests. Features like advance access to future issues and table of contents notification by email keep readers informed about topical issues and new contributions.”

Highlights of Volume 3 2010

■ International petroleum model contracts

Tim Martin and Jay Park

■ Is Argentina ready to promote renewable energies?

Pablo E. Arrascaeta

Plus articles on:

■ Modifications and reforms to the oil and gas industry in Mexico

■ Resource Abundance, Development and Competition Policy

■ Special Issue on Corporate Compliance, with articles on Global Anti-Corruption Laws, Sanctions, Environmental Compliance, Human Rights.

The journal is invaluable reading for:

- Lawyers and arbitrators involved in energy law throughout the world
- In-house counsel at energy corporations
- Government and international agency officials
- Experts from professional, industry, and nongovernmental associations
- Energy departments in major international law firms
- Academics interested in energy law issues
- Universities and research institutions
- NGOs
- Commercial, financial, economic, political, environmental and policy experts with an interest in energy regulation, business, economics, transactions and law

Practical, insightful and relevant information on emerging issues that will assist petroleum negotiators and lawyers in their transactional work

Journal of World Energy Law & Business addresses emerging issues such as the large-scale move to public ownership in energy producing jurisdictions, the growth of independent regulatory agencies and the accompanying increase in regulation. As demand for oil and gas increases, international oil companies are being squeezed out of the main producing areas. Energy-hungry giant consumers with burgeoning economies such as China, India, and Brazil compete with energy demand from the US and the EU. The *Journal of World Energy Law & Business* addresses these emerging areas of concern with topical and insightful articles.

Latest thinking on best practices and tools in the industry

As oil, gas, coal and uranium markets become increasingly global, and electricity becomes more regional, topics such as privatisation, liberalisation and market integration are essential areas of knowledge for the energy practitioner. *Journal of World Energy Law & Business* provides a guide through these increasingly complex kinds of transactions in the energy world, such as production-sharing, joint operating, joint tender, gas sales and project finance contracts. *Journal of World Energy Law & Business* provides in-depth analysis of the model contracts developed and used in the international oil and gas industry and the regulatory and compliance regimes faced by energy companies throughout the world. It also offers readers advance access online publication – allowing readers to get the latest articles weeks ahead of print publication.

Access to AIPN knowledge and expertise

The AIPN is the leading professional organization in the energy industry that researches and develops the most significant transactional material used by governments and industry throughout the world. It is the leading educator in this field with its courses, workshops, seminars and

conferences. *Journal of World Energy Law & Business* has unlimited access to the AIPN's research, educational material, events and key personnel as its official journal. You can tap into this world-class reservoir of knowledge and expertise as a subscriber to the *Journal of World Energy Law & Business*.
